08.30 - 18.00

SUN SIYAM IRU FUSHI MALDIVES

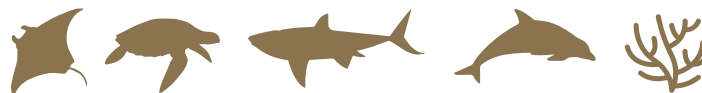

221 villas | Noonu Atoll

Only 45 minutes by seaplane, north of Male' in Noonu Atoll, a new diving area awaits for the divers who have seen it all in the Maldives.

From spectacular channel dives and beautiful thila's this dive area is very unique! The house reef is prolific with soft and hard corals and used to be a fishing point for the local fishers because of abundant fish life. Mantas visit the house reef during day and night and can also be seen at different locations on the reef.

One thila named 'Christmas tree' is build up out of different layers of plateau's completely overgrown with hard and soft corals and inhabited by clouds of reef fishes. The thila is home to nurse and leopard sharks, sting rays and the famous guitar sharks, who find shelter underneath the large caves at the sandy bottom.

SUN SIYAM VILU REEF

103 villas | South Nilandhe Atoll (Dhaalu Atoll)

The reefs around Vilu Reef offers a great variety in shape and layout, they display beautiful soft and hard corals and are teeming with Macro Life. Pelagic's such as white tip and grey reef sharks, napoleons, sail fishes, tunas, skip jacks, eagle and sting rays are cruising the reefs only 15 minutes boat drive from Vilu Reef.

The diving is easier than in other Atolls in the Maldives because of the wide channels and the shallower drop offs. From December until May mantas are appearing on the cleaning stations and can be seen from very close by on our manta point.

A full day trip to the whale shark point is a highlight for every diver who is keen to meet up with the gentle giants for once in a life time experience!

Sun Siyam Olhuveli

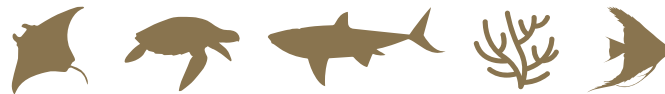

SUN SIYAM OLHUVELI MALDIVES

225 villas | South Malé Atoll

The diving sites around Olhuveli have everything to offer, from easy, long reef diving with the possibility to see whale sharks, tuna fish, sharks, eagle rays, mantas and turtles, from thila, giri and channel dives with stunning coral formations and an amazing variety of reef fish and gobies.

From January until April you will see dolphins underwater and we have mantas at night at the house reef feeding on plankton attracted by big lights, it is possible to make a night dive with the manta at the house reef.

SUN SIYAM IRU VELI

125 villas | South Nilandhe Atoll (Dhaalu Atoll)

Sun Siyam Iru Veli is situated in the middle of the North part of Dhaalu Atoll, which is the ideal location for visiting dive sites on the West and East side of the Atoll within 25 min travel with the dive boat. The Atoll channels offer a great variety of Pelagic marine life including sharks, eagle rays, tunas, blue marlins, napoleon fishes among huge schools of fuseliars, yellow snappers, unicorn fishes and rainbow runners. The Macro life is stunning; scorpion, ghost-pipe, stone and frog fishes, manta shrimps and long-nose hawk fishes can be discovered.

The diving inside the Atoll is easy and relaxing while for more adventurous and experienced divers the channels offer exciting and breath taking dives. From December until May mantas are appearing on the cleaning stations and can be seen from very close by at our manta point. Full day trips to the whale shark point is a highlight for every diver who is keen to meet up with the gentle giant for once in a life time experience!
